

# GETTING ADDED VALUE

Buying a new furnace or heating system is an investment in your home.

At SOLACE Energy, our expertise ensures that your investment provides optimal comfort, indoor air quality and cost savings. You and your family can count on us.

Keep in mind that there are no regulated inspections to protect your investment so consider the following when choosing a heating specialist:

COMPETITOR

## EXPERTISE & EXPERIENCE

- First BC company to install high-efficiency furnaces, with **over 1,000 installs** since 1988
- “Factory Authorized Dealer” for the highest standard in technical expertise and your **peace of mind**
- North American Technician Excellence (NATE) **certified professionals**

## SUPERIOR INSTALLATION

- Custom fittings and our own installers, ensuring the highest standard of **quality control**
- Thorough assessment and heat-load calculation of every home to guarantee a properly fitted furnace that’s **efficient, quiet, durable and warm**

## OPTIMAL PERFORMANCE & COMFORT

- High-efficiency filters that **improve indoor air quality** and prolong **efficiency and durability**
- **Air leakage prevention** through foil taped seams for perfect duct sealing
- Use of rubber isolation pads and canvas connectors that provide **reduction of noise and prevention of trapped moisture** below the furnace

## RELIABILITY FOR THE LONG-TERM

- Option to prepare furnace for a future heat pump, for cooling needs, **added comfort and energy savings**
- Commercial grade electrical switch, providing **easy shutdown access** for servicing
- Mounted holder on furnace for easy access to **manuals and service records**
- Maintained records of your equipment details and service history for **convenient tracking** of service requirements

## Local Expertise

SOLACE Energy services the Lower Mainland with 35 staff operating from showrooms in Burnaby and Port Moody. Celebrating our 30th anniversary, SOLACE delivers leading edge solutions to homeowners through sales and service of:

- **FURNACES**
- **HEAT PUMPS**
- **GEOHERMAL**
- **FIREPLACES**
- **BARBEQUES**
- **AIR QUALITY**

We are repeatedly voted the “Best Fireplace Store” by our customers in Burnaby and Tri-Cities. Our exceptional service was featured on the CBC reality television challenge Code Green Canada.

## Global Leadership

SOLACE is proud to be part of the **Homeworks** family of companies. All employees are partners in the UK-based parent company **eaga**.

eaga’s international strategy is to be a leader in providing solutions to environmental, energy efficiency and social challenges. Already a UK market leader in residential energy efficiency, eaga has completed more than 5 million home upgrades internationally.

SOLACE Energy and Homeworks support eaga as Western Canada’s leaders in addressing the climate change issues in Canada, through installation of energy efficient solutions.

## Reducing Your Home’s Impact on Climate Change

When you save energy by making your home more efficient, you also lower demand for energy production, thereby reducing both Greenhouse Gas (GHG) emissions and the impact to the environment. Taking action to improve your home’s energy efficiency will also improve your home’s comfort and health and save you money on energy bills.

Upgrade with SOLACE Energy to reduce your home’s GHG emissions by up to **4 tonnes annually**.

## Walking the Talk

*In 1983, SOLACE Energy owner Doug Rempel built and still lives in one of the first Government “Certified R2000 Homes” in Canada. It incorporates a Geothermal heating system which heats his 2,800 sq. ft. Burnaby home for under \$100 dollars per year.*
